DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The attorney's arguments filed 3/26/2007 disclose many arguments to which why the invention reads over the prior art. Starting on page 5, Applicant argues that the Zinn patent fails to disclose groove shaped rings processed with a magnetic material on the left and right ends of the lower rod. The applicant further argues on pages 6-10 of the combinations of patents and why the combinations of the patents are not applicable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takahashi (3,568,751), Congard (6,552,847), and Bernat (3,313,337) all disclose a projection screens that contain upper and lower rods in which the screen rolls up in, but all these screens lack a groove shaped rings on each side and a magnet that is coupled with them. Stephans (109,266) and Federick (5,791,629) each disclose upper and lower rods with rings, but neither is a projection screen, nor do they have magnets.
